

DATA CENTER FILTRATION SOLUTIONS

One Filtration Partner for Every Critical Data Center System.

King supports replacement filters, cross-references, hard-to-find parts, and complete engineered filtration systems from startup through operation.

 **Airside**

 **Liquid Cooling**

 **Water /
Heat Rejection**

 **Standby
Power**

 **Commissioning**

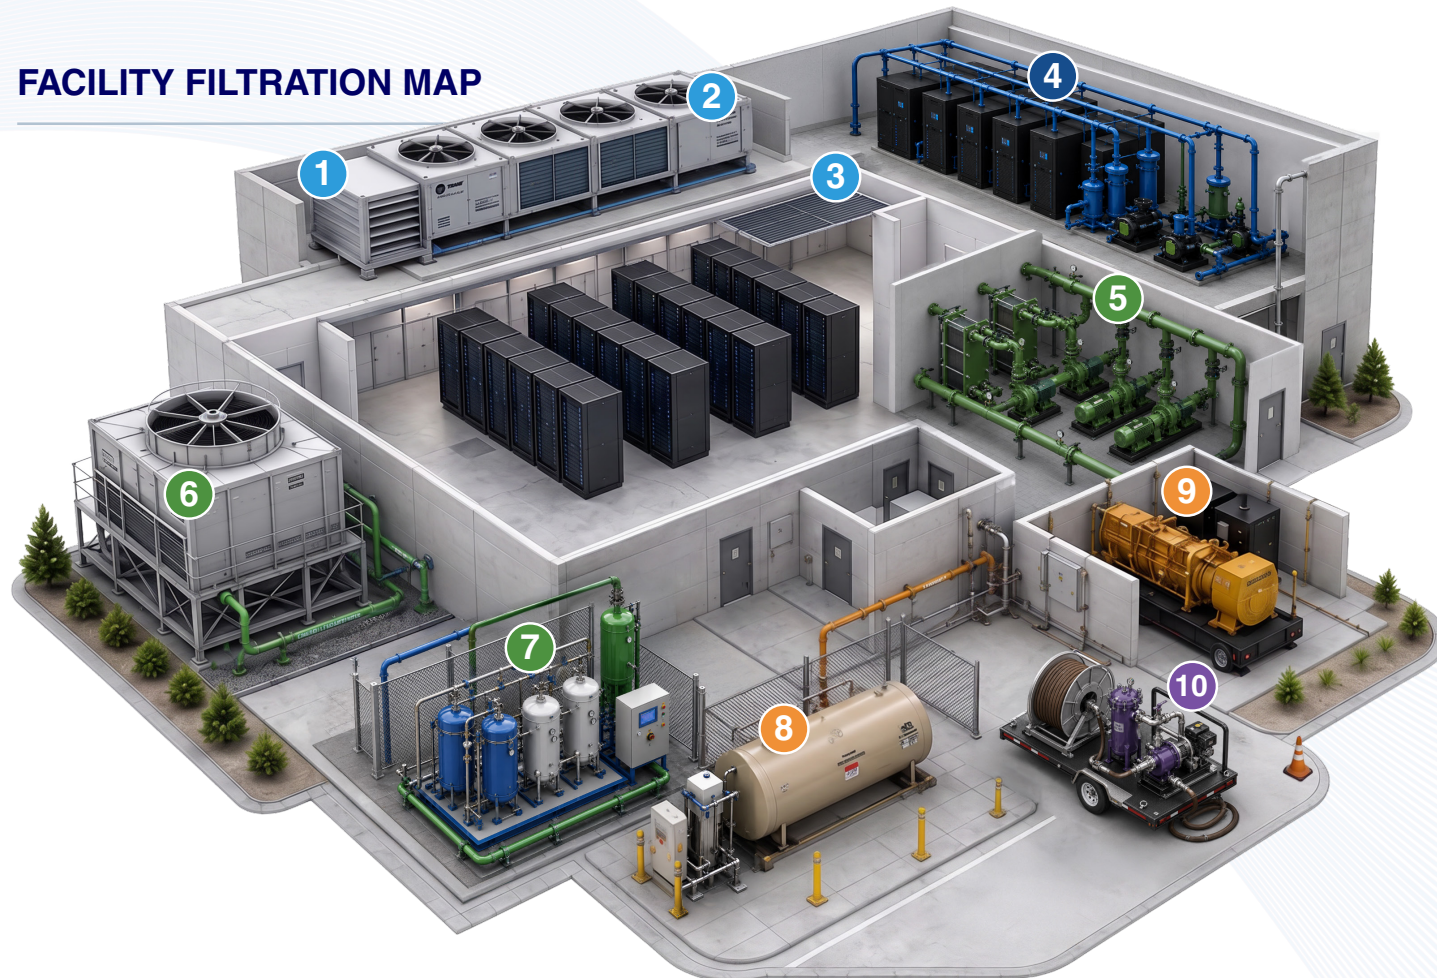

Need help sourcing a data center filter?

Send King a part number, photo, dimensions, or application details.

Filtration Solutions for Data Center Buildout, Commissioning, and Uptime

King helps data center teams source, replace, engineer, and support filtration across construction, commissioning, and operation.

FACILITY FILTRATION MAP

10 PLACES FILTRATION PROTECTS DATA CENTER SYSTEMS

- | | |
|--|---|
| 1 Outdoor Air Intake / Economizer Path | 7 Makeup Water / RO Pretreatment / Water Treatment Skid |
| 2 AHU / CRAH / CRAC Filtration | 8 Bulk Fuel Storage / Day Tank / Transfer System |
| 3 White Space Contamination Control | 9 Generator Engine Filtration |
| 4 CDU / Liquid Cooling Loop | 10 Startup Flushing / Temporary Filtration Skid |
| 5 Pumps, Heat Exchangers & Hydronic Piping | |
| 6 Cooling Tower / Heat Rejection System | |

Airside Filtration

Protect cooling airflow and critical spaces from airborne contamination.

- Replacement filters for AHUs, CRAHs, CRACs, and fan walls
- Intake, economizer, and room air filtration
- White space and server room contamination control

[Explore Airside Filtration >](#)

Liquid Cooling Systems

Keep high-density cooling loops protected from debris, fouling, and restriction.

- Filters and strainers for CDUs, coolant loops, and manifolds
- Housings and elements for pumps and heat exchangers
- Matched to your flow rate, fluid type, pressure, and micron requirement

[Explore Liquid Cooling Support >](#)

Water Systems & Heat Rejection

Reduce solids, fouling, and unplanned maintenance in cooling water systems.

- Filtration for cooling towers and heat rejection equipment
- RO pretreatment and water treatment support
- Protection for pumps, heat exchangers, and distribution loops

[Explore Water System Filtration >](#)

Standby Power & Fuel Systems

Keep generators ready to start when utility power fails.

- Complete fuel systems, custom / private-label options, and rental support
- Fuel polishing, transfer filtration, and water separation
- Engine air intake, lube oil, and generator filter support

[Explore Standby Power Filtration >](#)

Construction & Commissioning

Protect critical systems from first flush to final handoff.

- Temporary filtration and startup strainers
- High-flow flushing and commissioning filtration
- Final operating filter sourcing before facility handoff

When Filtration Gets Complicated, King Makes It Easier.

Data centers depend on filters across critical systems, brands, and project stages. King helps identify unknown filters, cross-reference replacements, source hard-to-find parts, support engineered systems, and provide complete fuel filtration skids for standby power readiness.

Need Help Sourcing a Filtration Part or System?

Send King any available details:

- ✓ Part number or manufacturer
- ✓ Photo of the filter, housing, skid, or nameplate
- ✓ Dimensions
- ✓ Micron rating or efficiency requirement
- ✓ Air or fluid type
- ✓ System location or application
- ✓ Flow rate, pressure, or timeline

Send what you have.

A King specialist will review it and follow up with next-step options.
